50X1-HUM

7. Dresden: Motor fuel is stacked in a long, low building to the left of the main entrance to the former SS Barracks in Dresden and running parrellel to the road. Amminition is said to be stored in underground bunkers in the woods in front of the main entrance to the barracks. The bunkers are guarded by Soviet sentries. Another amminition bunker is some 600 meters to the west of the bunkers mentioned above.

50X1-HUM it has underground communications with the barracks.

(Mid-October 1947)

8. Wittenberge (Y-69): The strength of the German frontier police between Wittenberge and Obisfelde (Y-23) is three hundred men. This number is to be increased to 600 by 1 November 1947. These police come under the command of the CO of Soviet Frontier Posts in Kandeburg, but local German posts work under the head of the AVD in Stendal, who can also give them orders. The German police are divided into posts of three or four men each, stationed along the Demarcation Line. Soviet frontier posts, a rifle squad strong, are at times stationed between the German posts in order to supervise them.

9. Hirschstein (E-90): On 20 September the tanks and troops which had previously been stationed on the Borschutz state property near Muhlberg (E-82) and at Schloso Strehla (E-82) were transferred to Schloss Hirschstein on the Elie. The transferred to Schloss Hirschstein took the form of a route march.

(Early October 1947)

10. Zeithain (E-S1): The armunition dump and filling plant at Zeithain have been put to use by the Soviets. At ammunition of 37mm and 75mm was produced here for the Wehrmacht during the war. Practice artillery shoots with small caliber equipment are being carried out on the nearby Zeithain firing range.

- 11. Schlieben (E-86): It is rumored that Panzerfauste are being produced at the Schlieben ammunition depot, which is in Soviet use.
- 12. Torgau (E-64): The civilians interned in Torgau fortress are put to work in the ordnance factory west of the toum, immediately south of Suptitz. They are also used in the armunition dump located in the woods between the Torgau-Wiedenhain and Torgau-Wiedenhain roads. This dump is bounded on the west by a line running from Wiedenhain to Nockrehma and contains bunkers full of all types of ammunition.
- 13. Zwickeu (K-3A): A trailer capable of carrying fifty men, mounting no armament and being toued behind a tank, has been observed in the Zwickeu area and is rumored to have been used in the Ohrdruf (J-15) training area. The trailer is tracked and has normal suspension (probably four bogies). Its almost vertical thick armored sides provide some protection against AT weapons. One tank can tow two such trailers. Practice AT shoots against this type of vehicle were carried out in Altenburg (K-27).
